# **“Build it Right”**

## ***Energy-Efficient Construction Workshop***

**Plan now** to attend your Touchstone Energy Cooperative’s Fall 2007 “Build it Right” Workshop. It will feature information about techniques and products to make your home more energy-efficient (whether building, remodeling or adding on).

This is a **FREE WORKSHOP** to learn more about what you can do to save energy – from insulating, window replacement, heating system upgrades, tightening your home from air leaks. . . and more!

You don’t have to be a contractor or building expert to attend – just a regular person with an above-average interest in **saving money**, **increasing the comfort** of your home and making the **best use of** our energy resources.

Workshop leader will be Bill McNally, energy-efficient building expert and Iowa Central Community College carpentry instructor.

Select the date and location most convenient for you to attend the workshop that best fits your schedule. Workshops will be held 9 a.m. – 3 p.m. Refreshments begin at 8:30 a.m. and lunch at noon is also included.

**Workshop Leader**  
**Bill McNally**  
**Carpentry Instructor**  
**Iowa Central Community College**
